■ 8071 & 8073 RETRO-FIT — PLASTIC WRAP REQUIRED, PRICED IN

The 5/8" body on 8071 and 8073 cups in Houston humidity. Every 8071 and 8073 tread must ship **fully wrapped in plastic** — 4-side enclosure, min. 6 mil, with a continuous vapor sheet above and below each pallet layer. No exposed end grain, no partial wraps, no outdoor staging. End-coat all lengths 60" and over. UWP will reject at receiving for visible cupping, face checking, or MC variance.

Plastic wrap must be included in the unit price quoted on this sheet. Do not quote it as a separate adder or leave it out to reach a target price — a price without wrap will not be accepted for these two profiles.

Standing lead time agreed with Dendratec: **3–5 weeks, up to 6 when busy.** Note above if this order runs longer.

MILL SUPPLY SPECIFICATION

SPECIES & GRADE

- Red Oak (*Quercus rubra*) · White Oak (*Quercus alba*)
- Select Grade or better per CS 89-40. Face and nosing clear, free of sapwood.
- Glued-up stock matched for color and grain. Max two streaks per tread, 6" max length.

FACE, NOSING & DEFECTS

- Face and nosing smooth — no mill marks, chipped grain, torn fiber or skip milling.
- Nosing consistent and sharp. No feathering or rollover at the profile edge.
- Knots: sound and tight, 3/4" max dia., 2 per piece. Checks: 1/4 length max, no through splits. Holes: spot-worm 1/16" max, 1 per lineal foot.

STAVE CONSTRUCTION

- 3 to 5 staves maximum per tread, color-matched and grain-blended.
- No visible contrast between adjacent staves. No heartwood-to-sapwood transitions on the face.
- Glue joints tight, flush and continuous. Face grain consistent across all staves.

MOISTURE, LABELING & PACKAGING

- Kiln-dried to 6–8% EMC prior to machining.
- Each bundle labeled: species, grade, size, MC, mill name.
- Banded on pallets with edge protection, wrapped loads only. End-coat all lengths 60"+.
- 8071 / 8073 — full plastic wrap required (see above).**

Technology exemption. Suppliers using certified moisture-management technology (engineered stabilization, sealed surface systems, or proprietary equivalent) may request a wrap exemption with prior written UWP approval. Documentation required before shipment.
